

Microgrid Academy

What is Microgrid Certification Training?

Microgrid Certification Training is a 3-day course designed for all engineers who want to learn, design, or operate microgrids. It is also suitable for power traders to understand modern microgrid technologies and independent system operator personnel. The training covers understanding energy management systems (EMS) in microgrids, including centralized or decentralized microgrids.

What is a microgrid learning path?

This learning path will cover the fundamental elements of microgrid definitions, design, and analysis. First Chapter provides a comprehensive overview of microgrid concepts, functional features, and benefits, followed by examples of applications around the world as well as possible future directions.

What is the IEEE Academy on smart grid?

At the completion of the IEEE Academy on Smart Grid, the learner will be able to demonstrate their new knowledge and will earn a certificate. The IEEE Academy on Smart Grid will focus on the following technical areas: Microgrids are considered a critical and enabling link in the transition from bulk power systems to smart distributed grids.

This is Kerim, Kerim Baran with Solar Academy. I have today with me Josh Weaver of RaVolt. I had the pleasure to meet RaVolt at RE plus this past year in Vegas. And we chatted a little bit about your products at the ...

The first Micro-Grid Academy (MGA) course started on 15th January 2018 in Nairobi has so far trained 40 local and international students. Beginning with a pilot trial, the MGA aims to fully ...

Micro-Grid Academy turns one and is ready for more in 2019. RES4Africa, of which Enel Green Power is a founder, sponsors the initiative in collaboration with local companies, universities and NGOs. It aims to train ...
