

Does Guyana have a gas-to-energy project?

Kaieteur News - Three international companies from Germany, Puerto Rico and the USA have responded to a request for proposals (RFP) from the Government of Guyana for the operations and maintenance (O&M) of the Gas-to-Energy (GTE) 300-megawatt (MW) power plant project. An artist's impression of the Gas-to-Energy project.

Why is the energy sector important in Guyana?

The energy sector, the Prime Minister explained, is the lifeblood of any nation's development. "It is the bedrock upon which our economic prosperity, social progress, and wellbeing of our people depend." He said that tremendous improvement has been made by the Guyana Power and Light (GPL) since the current administration took office.

Why was the energy mixer held in Guyana?

The Energy Mixer was held under the theme "Delivering the Energy Benefits: The Transmission and Distribution System". Prime Minister Brigadier (Ret'd), the Honourable Mark Phillips, who is responsible for Guyana's energy sector, outlined the Government's plans to transform the nation's power infrastructure to meet its growing needs.

How will Guyana contribute to greener energy use?

This, he noted, will contribute to cleaner and greener energy use across the nation within the decade. By 2030, Guyana aims to produce 500 MW of electricity by embracing an energy mix composed predominantly of clean energy sources. Doing so would accommodate the growing demand for electricity while remaining environmentally conscious.

Will Guyana move to the next level of development?

In moving Guyana to the next level of development, the Prime Minister said that there needs to be an energy mix, which will give "Guyana thrust to enhance energy reliability, efficiency, sustainability, and overall economic development, this is a strategic imperative."

Will Guyana adopt a low carbon strategy?

Addressing Guyana's commitment to adopting a low carbon strategy, the Prime Minister stated, "Over the short, medium, and long term, we will, as a Government, fund numerous projects aimed at greater utilisation of clean and green energy - more solar, more wind, more hydro."
