

# Mobile phone displays photovoltaic inverter status

Can a SolarEdge inverter be activated without a display?

A: Only SolarEdge SetApp-enabled inverters(without a LCD display) can be activated or configured via SetApp. Q: Does the new app show real-time inverter status and measurements? A: Yes. To view inverter data when you are connected to the inverter with SetApp,select Status from the SetApp menu. Q: How can I see the system status without a display?

How do solar monitoring apps work?

Most solar monitoring apps and applications connect to your system through a special device called a datalogger,which continuously collects data from your inverter and other components.

Do solar monitoring apps need a datalogger?

Most solar monitoring apps require a dataloggerinstalled on your system. This device collects data from your inverter and transmits it to the app. Some newer systems might have built-in monitoring capabilities,eliminating the need for an additional device. Are these apps expensive? Costs vary!

How do I set up the shinephone app with my Growatt inverter?

Setting up the ShinePhone app with your Growatt inverter is very easy. You just need to follow these steps: Download and install the ShinePhone app on your smartphone from the Apple App Store or Google Play Store. Register an account on the app by entering your email address and password.

What types of inverters does the Growatt app support?

The app supports all Growatt products,such as grid-tie,off-grid,hybrid,and storage inverters. You need to have a monitoring device that connects your inverter or datalogger to the internet. This can be a Growatt Wi-Fi dongle,a Growatt Shine LAN-X dongle,or a Growatt Shine Link-X box.

How do I access my SolarEdge inverter?

If you already have a SolarEdge monitoring platform or Designer account,simply loginwith your user credentials. If you need fast and easy access to view the inverter's status and settings,the View Only mode can be used. This mode provides inspectors with viewing permissions without requiring app credentials.

Most solar monitoring apps and applications connect to your system through a special device called a datalogger, which continuously collects data from your inverter and other components. This data is then transmitted ...

Smartphones and tablets can be effectively used in the solar photovoltaic (PV) energy field for different purposes because of their versatile capabilities incorporating hardware and software functionalities. These ...
