

Does Moldova have a good energy sector?

Moldova is also on the right path to developing a sound institutional structure in the energy sector, informed by better statistical data. The National Bureau of Statistics (NBS) is commended for its efforts to improve energy data collection and reporting.

What is Moldova's long-term goal in the electricity sector?

In the electricity sector, Moldova's long-term objective was to fully interconnect with the European Network of Transmission System Operators for Electricity (ENTSO-E). This was achieved significantly earlier than planned, due to Russia's invasion of Ukraine in late February 2022.

What drives the energy policy agenda of the Republic of Moldova (Moldova)?

The energy policy agenda of the Republic of Moldova (Moldova) is driven by several interrelated factors. The first key driver is high dependence on imports from limited sources and subsequent energy security considerations.

What are the sources of electricity and gas imports in Moldova?

The sources of electricity and gas imports are not diversified and crucially depend on gas supply from Russia and electricity supply from the Moldavskaya GRES power station, which operates beyond the control of the Moldovan government.

What challenges does the Moldovan energy sector face?

Despite all of these notable achievements, the Moldovan energy sector still faces major challenges which need to be addressed in a timely manner in order to improve energy security, accelerate the transition towards a more sustainable, clean and efficient energy system and support the development of free and competitive energy markets.

What is Moldova's energy self-sufficiency?

Moldova's energy self-sufficiency is among the lowest in the world: only around 25% of its energy demand is covered by domestic production, consisting almost entirely of solid biomass and variable renewable energy sources.
