

Does Mongolia have a fuel business?

The government of Mongolia did not reply to a request for comment. The Mongolian fuel business has generated high margins for Trafigura, which blended various imported fuels and also made money on loans to the cash-strapped local coal and fuel distribution industries, according to the three trading sources.

What does Mongolia Energy Corporation do?

MONGOLIA ENERGY CORPORATION LIMITED is a Hong Kong-based investment holding company principally engaged in resources businesses. The Company's main businesses include the mining of coal, the production and sales of coal products, such as cleaned coking coal and steam coal, the provision of coal transportation services, as well as coal processing.

Who is Mongolia's key fuel supplier?

Trafigura became Mongolia's key fuel supplier around 2014, according to the three trading sources. The government declined to comment. Trafigura says they were one of the top suppliers of Mongolia.

What is Mongolia's coal industry?

Mongolia's coal industry is the top consumer of the fuel, used in heavy machinery to produce coal for export to China. Trafigura and Lex established a partnership in 2019, the three trading sources said. Trafigura provided credit to Lex to supply local customers.

Does Mongolia have a good energy policy?

A failure to recognize the impact of mineral resources such as coal and copper on Mongolia's energy policy is deeply flawed and potentially dangerous. According to data from the Mongolian National Statistics Office, last year 86 percent of the country's exports were raw materials, including coal, copper concentrate, and gold.

How can Mongolia tackle its energy and economic security concerns?

Notably, Mongolia can tackle both its energy and economic security concerns with one approach. Mongolia has the potential to sustain its domestic electricity demand through renewable energy sources such as solar, wind, and hydro.
