Can you move solar panels to a new house?

Yes, you can take your solar panels to your new house. But depending on your situation, the process could be excessively complicated, and it might be prohibitively expensive. Before you decide to move with your solar panels, you'll want to consider the following factors. Will the Panels Fit?

Can a solar company move my solar system?

If you're moving within the service area covered by your solar company, you should be able to have them move the solar system for you. Of course, this won't be free. But you'll have the peace of mind of knowing that the process is being handled by qualified professionals.

What happens if you move solar panels outside your service area?

Things get more complicated when you move outside of your solar company's service area. Since they don't operate in your new neighborhood, you won't be able to have them move your solar panels. In that case, you'll either have to move the solar panels yourself or hire a third party to move them for you.
