

Musk's solar and energy storage business

Does Tesla have an energy business?

Watch the video for a look inside Tesla's energy business. In 2015, Elon Musk announced Tesla would get into the energy business, and it has been slowly ramping up deployments of its energy storage products since.

Is Elon Musk a solar salesman?

In a recent internal email to Tesla employees, Musk outlined two critical year-end priorities: delivering all cars to their customers and boosting the rate of solar deployments by a significant degree. Skeptics point to a variety of other reasons why Musk may be in solar- and energy-business salesman mode, beyond the Model 3 inflection point.

Does Tesla have energy storage?

A little under 25% of project awards it recently announced included energy storage. Tesla is building massive "gigafactories" to produce lithium-ion batteries for electric vehicles and Tesla Energy's storage solutions business, including its newest Gigafactory 3 in Shanghai, China.

Will Elon Musk reshape the energy grid?

Here's how. Elon Musk has a radical plan to reshape the energy grid-- and it could protect against power cuts. During Tesla's first-quarter 2021 earnings call Monday, the CEO described how the firm's solar panels and batteries can work together to "operate as a giant distributed utility."

Does Tesla separate solar and energy storage revenue?

Tesla doesn't separate solar and energy storage revenue. More importantly, the cost of revenue for its solar and energy storage business was \$781 million, meaning that for the first time the total cost of producing and distributing these energy storage products was lower than the revenue it generated. That's good news.

Will Tesla's Solar business grow faster than its electric vehicle business?
