

# My photovoltaic panels are legally installed

Is it legal to install solar panels?

It is legal to install your solar panels; however, you must adhere to all building and electrical regulations, which might necessitate professional certification and can affect eligibility for incentive schemes. What happened to the Feed-in Tariff (FIT) scheme?

Do you need planning permission to install solar panels on your roof?

An increasing number of people are investing in solar energy. More and more homes are having solar panels, or solar tiles, installed on their roofs. Of course, with such installations, the topic of planning permission and building regulations often comes to the surface.

Do solar panels need Building Regulations approval?

Building regulations approval is mandatory for solar panel installations in the UK. The approval process ensures compliance with safety, structural, and electrical standards. It verifies that the installation is carried out by competent installers and that all relevant regulations are adhered to.

Do solar panels need planning permission?

Typically, solar panel installations in the UK are considered "permitted developments" and do not require planning permission, as long as they meet certain conditions. However, permissions are necessary if the building is listed or in a conservation area. What is MCS certification and why is it important for solar panel installation?

Can solar panels be built without permission?

This is because they generally fall under permitted development rights, which allow homeowners to make reasonably sized changes without getting permission. The exceptions to this rule are typically flats, listed buildings, homes in conservation areas, and ground-mounted installations. What are the building regulations for solar panels?

Can I install solar panels myself?

Technically, you can install solar panels yourself, but we wouldn't recommend it. We don't doubt your handy work, but a trained professional with an MCS certificate will be able to install solar panels to the standard you'd ideally want - and to the standard expected by the Smart Export Guarantee.
