Does Myanmar have solar energy?

Levels vary widely across this geographically diverse Southeast Asian nation, but on the whole, Myanmar is endowed with an abundance of solar energy resource potential, an average solar irradiance of 4.5-5.1 kilowatt-hours per square meter per day (kWh/m<sup>2</sup>/day).

Can solar energy help rural healthcare facilities in Myanmar?

Lin Thu Hein, co-founder and executive director of a non-profit called Atutu, says the team is working to bring solar energy access to rural healthcare facilities in northern Myanmar, having started out bringing solar energy to indigenous communities and conflict-affected communities in Kachin State.

Where is Myanmar's first solar power plant located?

Myanmar's first solar power plant is located in Minbu, Magway Division. The plant produced 40 megawatts (MW) of electricity in its first phase of operations and will produce 170 MW once fully operational.

Is Myanmar a good country for generating electricity?

Renewable energy, in the form of large-scale hydroelectric power, already accounts for around 60%, the single largest share, of Myanmar's electricity generation mix. The country also has an abundance of natural gas, an important export and the source of hard, foreign currency export revenues, as well as domestic power generation.

Is lighting Myanmar a key element of Myanmar's universal electrification initiative?

Lighting Myanmar, a program led by the International Finance Corporation (IFC), is a key element of Myanmar's universal electrification initiative, SolarPower Europe's Myanmar research team pointed out.

Solar power in Myanmar has the potential to generate 51,973.8 TWh/year, with an average of over 5 sun hours per day. Even though most electricity is produced from hydropower in Myanmar, the country has rich technical solar power potential that is the highest in the Greater Mekong Subregion; however, in terms of installed capacity Myanmar lags largely behind Thailand and Vietnam.
