

How much energy does Myanmar have?

Myanmar's proven energy reserves in 2017 comprised of 94 million barrels of oil, 4.552 trillion cubic feet of gas, and over 500 million metric tons of coal. The country is a net exporter of energy, exporting substantial amounts of natural gas and coal to neighbouring countries. However, it imports around 90% of its total oil requirements. 1.2.

What is the energy demand supply situation in Myanmar?

The Myanmar energy demand supply situation indicates that power generation mix must shift to more coal and hydropower, continued use of biomass, natural gas consumption, and appropriate increase of renewable energy such as solar PV and wind power generation.

What is the energy saving potential of Myanmar?

According to the 2015 Asian Development Bank report 'National Energy Efficiency and Conservation Policy, Strategy and Roadmap of Myanmar', electricity consumption in all sectors and achievable energy saving potential should reach 12% by 2020, 16% by 2025, and 20% by 2030.

How to estimate the total energy consumption of Myanmar industries?

At the national level, this will also need the total production of the sub-sector to estimate its energy consumption. In conclusion, the national production or gross value added of the sub-sector is very important in estimating the total energy consumption of Myanmar industries. The parking lot survey was conducted in several areas of Yangon.

How is transport energy consumed in Myanmar?

In Myanmar, transport energy consumption is projected based on the energy requirements of major sectors (industry, transport, agriculture, and households). The choice of fuel type is determined by available supply, since energy demands must be met mainly by domestic sources.

What are Myanmar's sources of electricity?

Myanmar's sources for power generation were mainly natural gas and hydro resources. In 2000, total electricity production was 5,118 gigawatt-hours (GWh) and 62% of this total was generated from natural gas power plants. The remaining shares were hydro (37%) and oil (1%).

The project is currently owned by EGAT International with a stake of 30%, Ministry of Electricity and Energy, Myanmar with a stake of 10%, International Group of Entrepreneurs with a stake of 4%, China Southern Power Grid, China Three Gorges and Sinohydro. The hydro reservoir capacity is planned to be 39,800 million cubic meter.
