

Where will Hungary's largest energy storage system be built?

With funds obtained through a previous program, transmission system operator MAVIR is already building the country's largest energy storage system - a 20 MW project in Szolnok, central Hungary, the ministry said. It added that several projects with even bigger capacity will be installed under the tender concluded a few days ago.

How will Hungary support new energy storage projects?

Hungary is aiming to support the installation of at least 800MW/1,600MWh of new energy storage projects through the scheme. The projects will help to integrate new renewable energy resources in its electricity system. The funding is equivalent to HUF 436 billion.

How much money is available for energy projects in Hungary?

The funding is equivalent to HUF 436 billion. The money is available for companies active in Hungary's energy sector, except financial institutions, and will also be available for projects outside its borders which can provide the power through cross-border transmission capacity.

Which energy storage companies are deploying large-scale Bess projects in Hungary?

System integrators Tesla and W&#228;rtsil&#228;; have deployed large-scale BESS projects in Hungary previously. Energy-Storage.news' publisher Solar Media will host the inaugural Energy Storage Summit Central Eastern Europe on 26-27 September this year.

What is Energy Storage Summit Central Eastern Europe?

Energy-Storage.news' publisher Solar Media will host the inaugural Energy Storage Summit Central Eastern Europe on 26-27 September this year. This event will bring together the region's leading investors, policymakers, developers, utilities, energy buyers and service providers all in one place, as the region readies itself for storage to take off.

Which energy storage technologies are eligible?

All energy storage technologies are eligible, although lithium-ion remains the technology of choice for the vast majority of large-scale projects today. The projects will be selected through a competitive bidding process and grants will be awarded before the end of 2025.
