

Namibia waste sorting cabinets

Can Namibia be a model for waste management in Africa?

The objective is to make Namibia a model for waste management in Africa by 2028. In order to improve waste management in Namibia, the government has developed a new solid waste management strategy. The policy is being implemented by the Ministry of Environment and Tourism through a consultative process.

Why is waste management important in Namibia?

EXECUTIVE SUMMARY Waste management and recycling in particular have been highlighted by the Namibian Government as important focal areas for the sustainable management of natural resources. Currently, most waste in Namibia either ends up in landfills or is burnt.

Can Namibia transform the throw away culture into a culture of recycling?

The opportunity that lies in converting the throw away culture largely prevalent in Namibia, into a culture of Reducing, Re-using and Recycling where the value of recyclables and responsible waste management is embraced, is therefore great.

How does the recycling industry work in Namibia?

Income in the recycling industry is dictated by businesses located outside Namibia. The value of paper, plastics, metals and glass for recycling are set on international markets. Buy-back centres also allow more access to "Green Jobs" - employment opportunities, and would therefore be in line with Government's policy on employment creation.

Can Namibia improve sustainability through recycling?

CONCLUSION Despite the implementation of the Environmental Management Act, there is still a large vacuum in general awareness about recycling, limited access to facilities that support recycling, and inadequate support at National level, to fully harness the opportunity that exists within Namibia, to enhance sustainability through recycling.

What happens to waste in Namibia?

Currently, most waste in Namibia either ends up in landfills or is burnt. Both these approaches fail to realise the value in waste that can and should be harnessed, and in addition to the economic opportunity cost of not recycling, these practices also have adverse environmental impacts.
