

New Caledonia battery storage off grid

BSLBATT ESS-GRID FlexiO is an air-cooled solar battery storage system featuring a split PCS and battery cabinet with 1+N scalability. It integrates solar photovoltaic, diesel power generation, grid, and utility power, making it ideal for microgrids, rural and remote areas, large-scale manufacturing, farms, and electric vehicle charging stations.

The two projects (pictured) are sited at a Southern California Edison substation in Santa Ana, California. Image: Convergent Energy + Power. Convergent Energy + Power has celebrated the successful commissioning and start of commercial operations at two battery energy storage system (BESS) projects with a combined capacity of 60MWh in California, US.

French renewables developer Akuo has won a tender to build a large-scale battery storage system in New Caledonia, a French overseas territory in the southwestern Pacific Ocean. The giant battery is expected to be the largest storage facility in the region and also in France, with a planned storage capacity of 200 MWh.

When grid-connected, or connected to a local micro-grid, the Soltaro AIO2 can be connected in parallel. This allows your system to be modular and expandable as your energy storage needs change. The batteries are also modular. You can add more battery storage at any time to expand your storage capacity should your needs change.
