

New Caledonia solar panels in usa

How many solar panels does New Caledonia have?

Equipped with more than 58,000 solar panels, the plant has installed capacity of nearly 16 megawatts-peak (MWp), enough to cover the energy needs of over 21,000 residents of New Caledonia. The plant will feature a lithium-ion energy storage system (ESS) with a capacity of nearly 10 MW.

What is New Caledonia Energy?

New Caledonia Energy is the entity responsible for developing the project for the new power station that will supply the energy for Société Le Nickel (SLN). The current power station is nearly 50 years old and is highly polluting. The ultimate goal is to have a carbon-neutral plant by 2030, which would be a world first in the mining sector.

Where is New Caledonia located?

The northern half of Poya, with the main settlement and most of the population, is part of the North Province, while the southern half of the commune, with only 210 inhabitants in 2019, is part of the South Province. New Caledonia is part of Zealandia, a fragment of the ancient Gondwana super-continent, which is part of Oceania.
