

New Caledonia system pro m compact insite

What is system Pro M compact® Insite?

System pro M compact® InSite With a range of connected devices to support energy and asset management in electric distribution->02, System pro M compact® InSite can be installed as a standalone solution or integrated into any IT infrastructure, eg, cloud-based ABB Ability(TM) platform; making energy efficiency standards compliance easy.

What is ABB system Pro M compact® Insite?

ABB's System pro M compact® InSite range offers customers scalability, flexibility and transparency and a cyber-secure standards-compliant means of energy and asset management for their entire electric sub distribution, today and in the future, thereby helping them toward a more conscious utilization of resources and energy efficiency.

What is a pro M compact ® Insite scu100?

pro M compact® InSite SCU100 The SCU100 is capable of collecting measurements and information from up to 16 energy and power meters, in addition to 96 current sensors and digital channels, all simultaneously. It calculates the energy and number of operations at single line level and compares stored

What is ABB system Pro M compact®?

ABB's System pro M compact® InSite range of energy and asset management solutions for sub distribution accomplishes this by being smart and scalable, energy efficient and by enabling continuity of operation. -- optimizing asset management by controlling and monitoring operations and costs leads to energy efficiency. in the field.

What is a system Pro M® Insite scu100 control unit?

to regular firmware updates. Central to the System pro M® InSite range is the SCU100 control unit, that has been specifically developed to allow users to better manage energy and assets in sub distribution boards. It can gather data from up to 16 energy and power meters, as well current s

What is Insite Pro M REST API gateway application?

InSite Pro M REST API gateway application is built to ease the integration of the system with a customer's cloud; including secure access to control units in the field by deploying this application into the customer's cloud platform (available on request as Docker container image).

System pro M compact® InSite è stato sviluppato specificamente per soddisfare le esigenze della gestione energetica e degli impianti, monitorando e controllando il flusso energetico in quadri di distribuzione secondaria.
