

New Zealand 60kw solar system price

How much does solar cost in New Zealand?

When you're looking at Solar, we will put you in touch with two of New Zealand's top Installers. Solar panels and solar power energy systems have only gotten more affordable as the years have gone on. Just eight years ago, a 3kW system would cost you around \$40,000, while today the same system could be installed for less than \$9,000.

What is the average solar power system size in New Zealand?

The average residential solar power system size in New Zealand is 4kW. A 4 kW system consists of between 11 and 14 solar panels, dependent on the size of the panels. Commercial: Commercial sized systems typically start at 10kW (for instance, a small convenience store) and up to 150kW for a large big-box store.

How much money can a 60kW solar system generate?

On a yearly basis, a 60kW commercial Solar System can generate approximately \$24,966. Estimated solar generation is calculated by multiplying the number of estimated panels, the wattage of each panel, and the average number of sunshine hours per day.

How much does a 10 kW solar system cost?

On the other hand, a larger, 10 kW system can cost around \$25,000, or about \$2.5/W. Let us dive a little deeper. While solar panels steal most of the spotlight in any system, they are only one of the numerous components that make up the system. A typical solar power system consists of the following:

What is a 60kW Solar System?

The 60kW commercial Solar Power System is aimed at the medium to large commercial sector with high energy consumption, and is the perfect way to cut your electricity bills, reduce your carbon footprint and boost your profits. What's in a typical 60kW Solar System? How much power does a 60kW Solar System produce?

How much does a 3KW Solar System cost?

Just eight years ago, a 3kW system would cost you around \$40,000, while today the same system could be installed for less than \$9,000. As equipment and processes become more developed, and more efficient, prices drop, too. Home size, energy needs and available rooftop space also factor into the cost of your system.

On average solar batteries sold in New Zealand have a price range of \$6000-\$20000. This range is quite broad; lower-capacity batteries are cheaper than high-capacity batteries. Other than this, some solar panel systems such as Tesla Powerwall 2 have built-in storage systems which are why they cost more.

New Zealand has so far installed 85 MW of solar, and nearly half of which has been added during 2017-18 in more densely populated areas, such as Auckland and Canterbury. Currently, 2 kW and 5 kW solar systems are most popular in New Zealand.
