Does New Zealand have solar power?

Solar power in New Zealand is increasing in capacity, despite no government subsidies or interventions being available. As of the end of April 2024, New Zealand has 420 MW of grid-connected photovoltaic (PV) solar power installed, of which 146 MW (35%) was installed in the last 12 months.

What is New Zealand's largest solar farm?

(Source: Supplied) Plans have been revealed for what's believed to be New Zealand's largest solar farm. The joint British-New Zealand venture has consent to build the 182ha Tauhei Solar Farm near Te Aroha in Waikato. Expected to start construction this year, it aims to provide power for the equivalent of 35,000 homes.

Will solar PV make up 6% of New Zealand electricity supply?

Forecasts suggest Solar PV could make up 6% of New Zealand electricity supply by 2035. Explore solar installation data | Electricity Authority Over 560 solar panels have been installed on the roof of Parliament House.

How can solar power help New Zealand?

We're working with the sector on New Zealand's renewable energy and low-emissions transition. We're responsible for the governance and regulation of New Zealand's electricity industry. Solar power can help you become more self-sufficient, reduce your carbon footprint and reduce your energy costs.

How many solar panels are installed in New Zealand?

In October 2022, Electricity Authority data showed 43,641 solar systems installed across New Zealand, adding up to 240 MW. This makes up an estimated contribution of under 1% of total electricity consumption. Globally, solar PV uptake has increased significantly over the past decade.

Could solar power be the future of New Zealand's electricity grid?

This decrease in cost - which is expected to keep falling - means that solar may potentially play a stronger role in our electricity grid as electrification intensifies. Forecasts suggest Solar PV could make up 6% of New Zealand electricity supply by 2035. Explore solar installation data | Electricity Authority
