

Does Orano own uranium in Niger?

The French firm has been present in Niger since 1971. A uranium mine at Arkokan has been closed since 2021 but Orano runs another uranium mine in the northern region of Arlit despite what it calls "logistical" difficulties. Niger is landlocked and its border with Benin, its main sea access, is closed.

When did uranium mining start in Niger?

Mining was meant to have started at Imouraren in 2015 but development was frozen after the collapse in world uranium prices in the wake of the 2011 Japanese nuclear disaster. The Niger government did not immediately comment on the company's statement.

Why did Niger revoke Orano licence?

Niamey (Niger) (AFP) - Niger has revoked the operating licence of French nuclear fuel producer Orano at one of the world's biggest uranium mines, the company said Thursday, in a move that highlighted tensions between France and the African country's ruling junta.

Should Niger make concessions to Orano?

But Niger's junta feels no need to make concessions to Orano because it is now buoyed by a sharp rise in oil exports, thanks to a new Chinese-built pipeline.

Can Niger export uranium?

But the closure is an obstacle to exports of Niger's minerals. Niger in 2022 accounted for about a quarter of the natural uranium supplied to European nuclear power plants, according to data from the atomic organisation Euratom. Kazakhstan is Europe's main supplier, ahead of Niger and then Canada.

Does Imouraren have a uranium mine in Niger?

It said Imouraren would eventually provide jobs for 800 people on the project, including subcontractors. The French firm has been present in Niger since 1971. A uranium mine at Arkokan has been closed since 2021 but Orano runs another uranium mine in the northern region of Arlit despite what it calls "logistical" difficulties.
