

Does Nigeria need an energy transition plan?

While Nigeria recently launched the Energy Transition Plan that supports achieving universal access to energy by 2030 and a carbon-neutral energy system by 2060, there is a need for an action plan that states targets and timeline. This will enable the plan to be properly monitored and its goals achieved.

What are the challenges facing Nigeria's energy transition?

Nigeria's energy transition is fraught with many challenges. Image: Unsplash. Approximately 71% of Nigeria's population does not have access to energy. The Nigerian government plans to achieve universal energy access by 2030. The energy sector faces major financial and technical challenges.

What is Nigeria's energy source?

Nigeria's energy source is mainly derived from petroleum reserves, natural gas, hydroelectricity and solar. The country remains a top producer of crude oil and natural gas in Africa. Some 45% of Nigeria's population is actively connected to the energy grid and much of that is concentrated in urban areas.

Does Nigeria rely on energy?

But the country's government and economy depend on energy. Nigeria is Africa's biggest oil producer, with fossil fuels accounting for 60% of government revenue and 90% of foreign exchange earnings. The Petroleum Industry Act, which Buhari signed into law in August, envisions an even greater role for oil and gas in Nigeria's economy.

What if off-grid capacity is included in Nigeria's Energy Plan?

When off-grid capacity is included, gas and renewables will contribute roughly 30% each to planned power generation capacity of 45 gigawatts. "In Nigeria, clean energy is central to our government's plan to transition to net-zero emissions," Osinbajo, the vice president, continued.

Is biomass a source of electricity in Nigeria?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Nigeria: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

Nigeria's Energy Transition Plan (ETP) was developed in 2021 with support from the COP26 Energy Transition Council (ETC) and served as the basis for President Buhari's commitment to net zero by 2060 at COP26 in Glasgow. ...
