Our Airborne Wind Energy System utilizes kite sails to capture wind energy efficiently at altitudes up to 1,000 meters. This plug-and-play system operates autonomously, generating power from 10 kW to over 500 kW with minimal environmental impact and at a significantly lower cost than traditional turbines.

Solar-led renewable energy system could free up 10% of Antigua and Barbuda's GDP March 24, 2021 A mix of solar and wind power can help Antigua and Barbuda to an almost-90% renewable energy system, and green hydrogen could then show the path to hitting the national ambition of 100% green power by 2030, and net zero by 2050. Source

The Governmental System. Antigua and Barbuda is a constitutional monarchy with a British-style parliamentary system of government. The reigning British monarch is represented in Antigua by an appointed governor general as the head of state. The government has three branches: legislative, executive, and judicial.

A mix of solar and wind power can help Antigua and Barbuda to an almost-90% renewable energy system, and green hydrogen could then show the path to hitting the national ambition of 100% green power by 2030, and net zero by 2050.
