

Is India's solar power sector a Sunshine opportunity?

India's solar power sector is a sunshine opportunity waiting to be tapped with estimated potential of 7,48,990 MW. From job creation to fostering innovation and more, the solar power market is key to India's economic development & energy transition.

Is India a good place to invest in solar energy?

India's renewable energy sector, particularly solar power, is experiencing remarkable growth. The country aims to reach 500 GW of installed renewable energy capacity by 2030. This ambition positions India as an attractive market for global investors seeking opportunities in the expanding solar energy sector.

What are India's Solar Exports?

India's solar exports rose 227% to \$1.8 billion in 2023 from \$561 million in 2022 and the US accounted for over 97% of Indian exports. The rest were from Indonesia and a couple of African countries. With more developing countries embracing solar and other renewable energy, opportunities are growing for Indian solar equipment makers.

What is India's commitment to solar energy?

Another critical initiative underlining India's commitment to solar energy is the Solar Park Scheme, designed to establish 50 Solar Parks of 500 MW and above with a cumulative capacity of ~38 GW by 2025-26.

Is India ready for a massive solar equipment manufacturing ecosystem?

Those are just the beginning of a massive solar equipment manufacturing ecosystem evolving in the country, targeting both the domestic and export markets. In the first half of the year 2024, India added a record 11.3 GW of solar modules and 2 GW of solar cell capacity.

Is India a player in the Solar Revolution?

India stands not as a mere spectator but as a prominent player in the global solar revolution. India currently stands 4th globally in solar power capacity. In the last five years, the country's solar installed capacity has experienced a monumental transformation, increasing from 21,651 MW to 70,096 MW in 2023.

5 ???· India's solar exports rose 227% to \$1.8 billion in 2023 from \$561 million in 2022 and the US accounted for over 97% of Indian exports. The rest were from Indonesia and a couple of African countries. With more developing countries embracing solar and other renewable ...
