

Nordex group Saudi Arabia

What is the Nordex group?

The Nordex Group offers customers worldwide technically and financially sustainable multi-megawatt onshore turbines for every wind strength and climate zone. We are providing solutions for markets with both limited grid availability and limited land availability.

Who makes Nordex wind turbines?

As one of the world's largest wind turbine manufacturers, the Nordex Group offers high-yield, cost-efficient wind turbines that enable long-term and economical power generation from wind energy in all geographical and climatic conditions. With the Delta4000 platform, the Nordex Group relies on tried-and-tested series-production technology.

Where is Nordex made?

At production facilities in Germany, Spain, Brazil, the US and India, the Group produces nacelles, rotor blades, and concrete towers. The company has offices and branches in more than 30 countries. The holding company, Nordex SE, is listed on the TecDAX and MDAX of the Frankfurt Stock Exchange (ISIN: DE000A0D6554).

What is Nordex gamma generation?

Nordex combines decades of experience in designing, constructing and operating wind turbines, delivering more than 20GW of sustainable energy worldwide. With the serially-produced multi-megawatt wind turbines of Nordex Gamma Generation N90/2500, N100/2500 and N117/2400, Nordex is able to offer high-efficiency turbines for onshore use.

Does Nordex offer a multi-megawatt wind turbine?

With the serially-produced multi-megawatt wind turbines of Nordex Gamma Generation N90/2500, N100/2500 and N117/2400, Nordex is able to offer high-efficiency turbines for onshore use. Since 2013, Nordex offers the Delta Generation with the N100/3300, the N117/3000, and the N131/3000 for strong, medium and light wind sites.

What is a Nordex gamma wind turbine?

As of 2013, the third generation of Nordex wind turbines included two platforms, rated at 2.4 and 3.3 MW. In Europe, Africa and North America Nordex manufactures and sells the Gamma series, a product family comprising the N90/2500, the N100/2500 and the N117/2400. The N90/2500 is a turbine being developed for strong winds.
