

Who built the largest solar power plant in North Macedonia?

Slovenia's energy group GEN-I completed the construction of the largest solar power plant in North Macedonia and connected it to the grid in September, four months ahead of the government's deadline.

Why is Gen-I launching a solar power plant in North Macedonia?

The start of operation represents an important milestone for the expansion of GEN-I in the implementation of large solar power plant projects and the production of carbon-free electricity as well as a key contribution to the so-called Green Scenario of North Macedonia under the Strategy for Energy Development.

Where is Gen-I solar power plant located?

Slovenia-based GEN-I connected its 17 MW solar power plant southeast of Skopje to the grid four months before the deadline. It is the largest photovoltaic facility in North Macedonia and the Western Balkans.

Where is Skopje's new photovoltaic system located?

The new photovoltaic system, the largest in the country, is located southeast of the capital Skopje. GEN-I Skopje, a subsidiary of Slovenia-based GEN-I, won the right to build it in 2019, at a tender for a 50-year lease of state-owned land. Construction started early last year.

Why should we invest in North Macedonia?

North Macedonia has always been an important market for us, and with this investment, we are even more connected. It is also an important milestone for GEN-I, demonstrating our willingness to lead the green transformation and our ability to deliver large-scale renewable energy projects.

The Slovenian energy company GEN-I has launched a 17 MW solar farm in North Macedonia, the biggest solar project in that country. GEN-I won the tender to build the solar farm on state-owned land in a 35 MW solar capacity auction in 2020. Construction of this solar farm, which is located near the village of Amzabegovo in central North Macedonia ...

It includes over 856 kilometers of cables. Construction started in November. Mey Energy said its contractors are all from North Macedonia. The new solar power plant will have a lifespan of 25 years. Company added that it will sell the electricity on the free market, primarily within the country. The solar power plant was built on private land.

GEN-I's future solar power plant, which will be located in the village of Amzabegovo in the Sveti Nikole municipality, is expected to be fully operational by early 2023. The facility is planned to generate 25 GWh a year and supply electricity to both North Macedonia and regional markets.
