

Did North Macedonia change its energy regulations?

There were no major energy legislative changes, but North Macedonia continued to harmonize its energy regulations with the EU Energy Community's Third Energy Package (TEP). North Macedonia's state-owned power company was unbundled and partially privatized in the early 2000s.

How many power plants are there in North Macedonia?

The electric power production system in North Macedonia consists of two coal power plants with a total installed capacity of 825 megawatts (MW), several hydro power plants with a total installed capacity of 695 MW, one combined generation power plant, a heavy oil plant, a few solar power plants, a few biogas plants, and one wind power farm.

How much will ESM invest in North Macedonia?

Final bids are expected in the second half of 2022. The investment is estimated at \$640 million and will be crucial for balancing the electricity system. ESM owns and operates North Macedonia's only wind farm, a 36.5 MW park in the southern part of the country. It plans to increase capacity with two separate 14 MW investments in the same area.

Will Macedonia re-open a dormant oil pipeline?

The pipeline and refinery have only been used for storage since 2013. The governments of North Macedonia and Greece are discussing re-opening the dormant oil pipeline.

The Government of the Republic of North Macedonia has approved the award of a concession to a Greek consortium of national power utility PPC and construction group Archirodon for the design, financing, construction, operation and maintenance of the 333 MW Pebren pumped-storage scheme.

Since the adoption of the new Energy Law in 2018, a day-ahead energy market has been expected to be implemented in North Macedonia. On 10 May 2023, the Macedonian National Electricity Market Operator ("MEMO") rolled-out and started operating the day-ahead electricity market exchange. This market is envisaged as one of the key elements of a future Western ...

Tutto grazie allo storage, i sistemi di accumulo di energia. I sistemi di storage sono fondamentali per il futuro dell'energia rinnovabile. Il loro ruolo è immagazzinare l'elettricità e renderla disponibile quando c'è maggiore necessità, fungendo da bilancia tra domanda e offerta e contribuendo a stabilizzare la rete.

Hikvision DS-TCP440-DB 4 MP Dual-Sensor iBeacon Guidance Camera. Built-in high-performance chip, supporting ANPR (accuracy $\geq 99.5\%$), detection of the parking space status (accuracy $\geq 99.99\%$), and smart analysis of crossing over line, motion detection, etc.

September 7, 2023: The BMZ Group announced plans on September 5 to build a new production plant in North Macedonia.
