

What is Mozambique's energy transition?

Mozambique's energy transition is based on four strategic pillars including: 1. Expanding clean energy expansion capacity through wind, hydroelectric projects and solar power plants to offset fossil fuels predominance; 2. Capitalising on green industrialisation through integrated projects around industrial corridors such as the Nacala corridor; 3.

Is Mozambique ready for energy transformation?

As the world shifts towards cleaner and more sustainable energy, Mozambique is positioning itself at the centre of this transformation, ensuring its energy projects are both ready and fully implemented to meet the growing demands of domestic, regional and the global market.

What is Mozambique's energy potential?

In this new age of industrialisation, Mozambique's energy potential places the country at the forefront of global energy investments. As it continues to develop its infrastructure and expertise in energy production, Mozambique is set to play a pivotal role in meeting future energy demands.

Why is Mozambique a key player in energy development?

As it continues to develop its infrastructure and expertise in energy production, Mozambique is set to play a pivotal role in meeting future energy demands. With significant projects in the pipeline, the country's readiness and commitment to energy development make it a key player in the global energy transition.

What is the Mozambique Gas & Energy Summit & exhibition?

The Mozambique Gas & Energy Summit & Exhibition's mission is to provide a thought leadership platform promoting key investments and business opportunities within Mozambique's energy sector. The country is leading energy exports in the region and the Summit will attract all key stakeholders from across the local and international energy value chain.

In Mozambique, around 40% of people have access to electricity, through the grid or mini/off-grid systems. The government has promoted solar PV solutions in rural areas, reporting that 700 schools and 800 other public buildings now have electricity from s

At CTRG, we have been a major force in Mozambique's energy sector and a driver of economic growth in Maputo for nearly a decade. Up until now, we have been the country's largest IPP in operation, with 175 MW of generation capacity, and we sell our entire output to EDM, Mozambique's national electricity company.
