

Norway greener power solutions

Does Norway need a green energy plan?

Norway has signed the Montreal biodiversity agreement, and green industrial developments will need to limit their impact on the local environment. The Government wants more efficient use of energy, and it will publish a comprehensive action plan for the energy efficiency across the economy.

Why is the energy transition in Norway so important?

hind its announced ambitions. The energy transition in Norway is closely linked to EU climate goals, energy transition policies, and energy-related dilemmas, and heavily impacted by international factors including the war in Ukraine and global supply-chain problems. EU demand, regulation, and policies are driving energy di

How will Norway speed up its green transition?

The roadmap shows how the Government will speed up Norway's green transition. The Green Industrial Initiative will boost Norwegian exports and contribute to Norway cutting its climate emissions in half by 2030. The "roadmap 2.0" contains nine priority sectors and almost 150 measures for value creation across green industries.

Are new hydropower plants coming to Norway?

However, many new hydropower plants are coming online in Norway. Recently, a company named Lyse opened Lysebotn 2 hydropower plant that is technologically advanced and can generate enough energy to supply over 75000 households each year. Similarly, it can adapt to the power market as it evolves. Image Source: Government.no

How can Bioresources contribute to Norway's green transition?

The forest and timber industry, and other bioeconomic sectors, have great potential for growth and jobs across Norway. Replacing fossil carbon with bioresources will be an important part of the green transition.

How many thermal power plants are there in Norway?

In 2018, thermal power covered 2.4 percent of the total of Norway's electricity production. Currently, Norway has 32 thermal power plants with a capacity of 1108 MW. For the past few years, their energy generation has stayed stable at 3.4 TW.

GPH is based in Norway, with offices in Bergen and Oslo. We will always have an agenda to contribute to a better market and better solutions for the industry. We believe that our approach to the trades in green energy will open the market for small and mid-sized actors as ...

Still the global champion in EV adoption, Norway continues to pioneer all kinds of solutions for smarter, greener mobility in cities. In cities such as Oslo and Bergen, people get around town in clean, quiet, efficient modes of transport - for work and play, on land and at sea.
