

# Novel solar energy Bahamas

Who supports solar power in the Bahamas?

This goal is supported by the Inter-American Development Bank (IDB) and the Bahamas Development Bank (BDB). Currently, solar power makes up less than 1% of all energy generated in The Bahamas. Oil is responsible for nearly all power generation with a 99% share of electricity production.

What is a solar energy microgrid in the Bahamas?

This initiative involves developing solar energy microgrids across the Family Islands. This also encompasses the Government's goal of The Bahamas having a 30 per cent renewable power generation by the year 2030.

Is the Bahamas ready for a sustainable future?

The Prime Minister said the choice The Bahamas faces is stark. "Continue down a path of expensive, unreliable energy or pivot towards a future where energy is sustainable, affordable and secure." He noted that this Government administration's number one focus is reducing the cost of living for every Bahamian.

How can Bahama's government transform the energy landscape?

"Continue down a path of expensive, unreliable energy or pivot towards a future where energy is sustainable, affordable and secure." He noted that this Government administration's number one focus is reducing the cost of living for every Bahamian. "Today, we take a bold step forward in transforming our energy landscape.
