Most solar materials are made of recyclable materials, e.g., glass, silicon and aluminum. Besides, solar generators don't use fossil fuels that threaten the environment. Portability. Solar generators are smaller and lighter than gas generators. So you don't need much space to store or transport solar generators. Ease of use

For solar charging, you need a special solar adapter cable that some manufacturers include in the solar generator kit. An average solar charging time is around 5 hours, but large generators like the Renogy Lycan 5000 and the Bluetti EP500 have a dual-charging mode which lets you charge from the grid and solar at the same time.
