

Connect Saint Helena Ltd is committed to reducing reliance on diesel power generation by harnessing renewable energy sources. Renewable energy is cheaper to produce and does not harm the environment. Electricity from Wind We currently have 12 wind driven turbines located at Deadwood Plain. These turbines provide in excess of 20% of the islands ...

System size and energy production. All solar quotes should include the size of the system and how much energy it is projected to produce. Most of the quotes you get will probably be in the same ballpark. But, if one is drastically larger or smaller than the others -- ask about it! Maybe one installer included shading from a tree, while another ...

The intention of the Energy Strategy is for St Helena to become 100% self-sufficient through renewable energy by 1 April 2022. This will be achieved through the following: A mixed model of energy production and storage; A targeted strategy to reduce demand through greener more efficient products and practices, which will include electric ...
