

How does Peter Island generate electricity?

The outer islands already use renewable resources to produce energy. Peter Island generates 70% of its electricity from two Wind Energy Solutions hybrid turbines rated at 250 kilowatts (kW) each, backed-up by diesel generators. Cooper Island generates more than 75% of its electric needs from solar PV and uses solar water heating.

Does Cooper Island use solar energy?

Cooper Island generates more than 75% of its electric needs from solar PV and uses solar water heating. Virgin Limited Edition has proposed building a resort on Mosquito Island with enough renewable energy generation to make the site carbon-neutral.

Does Necker Island have a microgrid?

Privately owned Necker Island is working with NRG Energy to build a renewably powered microgrid on the island that will incorporate 900 kW of wind capacity, 300 kW-direct current of solar capacity, and 500 kWh of energy storage. Sources The information provided in this fact sheet was developed using the following sources.

Registered Office: Jayla Place, 2nd floor, PO Box 216, Road Town, Tortola, British Virgin Islands, VG1110
