Can a solar power plant resemble a giant panda?

Using dark and light solar cells to create a shading effect, the aptly named Panda Green Energy opened a 50-megawatt (MW), CNY350 million solar power plant in Datong, China in June to resemble, well, a giant panda. It's Panda Green Energy's first of 100 proposed panda-shaped solar panel projects to be built mostly in Asia in the next five years.

Will a panda-shaped solar power plant be built in Asia?

It's Panda Green Energy's first of 100 proposed panda-shaped solar panel projects to be built mostly in Asia in the next five years. A single panda power plant can generate 3.2 million MW-hours of power over 25 years--the equivalent of reducing 2.7 million tons of carbon dioxide emissions.

Could a panda be a solar energy farm?

And now, the beloved bear will make an appearance in a new field, quite literally: solar energy farms. The Chinese energy company Panda Green Energy Group is building 100 panda-shaped solar energy farms across the country. From above, the assortment of panels will look like a cartoon panda smiling up at the sky.

Are pandas the new face of solar energy?

The adorable creature is the new face of the solar energy initiative. Harvey Barrison/Flickr. As the country's national animal, pandas are everywhere in China. They appear on fuzzy slippers, crackers, and coins. And now, the beloved bear will make an appearance in a new field, quite literally: solar energy farms.

How many panda-shaped solar energy farms are there in China?

The Chinese energy company Panda Green Energy Group is building 100 panda-shaped solar energy farms across the country. From above, the assortment of panels will look like a cartoon panda smiling up at the sky. Video from dwnnews on Twitter. The group has already build one in Datong, Shanxi province and is currently working on another.

Will a panda-shaped solar farm save the world?

Once completed, the two 50 MW solar farms in the province will supply enough energy to power 10,000 houses annually. According to Panda Green Energy Group, one panda-shaped solar farm will prevent the equivalent of 1.06 million tons of coal from being burned and 2.75 million tons of greenhouse gas being emitted in the next 25 years.

From the start, we streamline customer service for manufacturers, reducing costs and increasing satisfaction. Along the way, we ensure EPCs experience first-round commissioning success. And crossing the finish line, we keep systems ...
