

# Panda Solar Power Station Design

Is this China's largest solar power plant in the shape of a panda?

A new solar power plant in Datong, China, however, decided to have a little fun with its design. China Merchants New Energy Group, one of the country's largest clean energy operators, built a 248-acre solar farm in the shape of a giant panda. The first phase, which includes one 50-megawatt plant, was completed on June 30, according to PV magazine.

What is the Panda Power Plant?

The Panda Power Plant in Datong, China will stretch 1,500 acres when complete. China Merchants New Energy Group worked with the United Nations Development Program (UNDP) to make the Panda Power Plant a reality. The project is part of a larger effort to raise awareness among young people in China about clean energy, the UNDP wrote in a statement.

Does China have a solar farm shaped like a panda?

China has a 250-acre solar farm shaped like a panda in Datong. This is part of China's commitment to ramping up renewable energy resources. The effort is also a PR campaign as China continues to lead the world in renewable energy investment.

When did the first Panda solar station start in Datong?

The first Panda Solar Station started operating in Datong in August 2017 (Credit: Getty Images). China is not only home to some of the biggest solar farms; its technology looks set to influence energy policy across the globe. But how feasible are these grand plans?

Is Fiji building a solar farm shaped like a panda?

China has built a 250-acre solar farm shaped like a giant panda. Fiji announced plans for a smaller panda-shaped solar farm, which is part of China's larger Belt and Road Initiative. This initiative, a foundation of Xi Jinping's foreign policy, aims to place China as a leader in external policy in Asia.

Can you see a giant panda in China?

Fly over "Datong County", a region in northern China, and you'll see two giant pandas. One is waving at you. They are made of thousands of solar panels. Together, and with the other adjacent panels included, they form a 100-megawatt farm covering 248 acres.
