

# Panel storage systems New Zealand

Can a solar panel system save energy in New Zealand?

In many New Zealand homes, solar panels generate energy when it is least needed-during high sunshine hours in the middle of the day. However, integrating home battery storage with a solar panel system is a great solution to store unused energy, which can then be used at night, on days with low sunlight and when utility lines are down.

Does New Zealand have a battery storage system?

While this is still an emerging technology in New Zealand, it's highly compatible with households that are grid-tied and use home battery storage. What size of battery is needed for a typical family home?

How long do solar panels last in New Zealand?

Solar panels in New Zealand are expected to last well over 25 years. This being the case, we recommend installing them on a new roof and new builds. You are creating an energy efficient home using the world's fastest growing energy source that will survive the test of time. "Such a hassle free process."
