As part of an international drive for green hydrogen development, Fortescue Future Industries has signed a comprehensive agreement on feasibility studies for hydropower and geothermal projects in Papua New Guinea.

What is the Green Energy Vision for Papua New Guinea?

Our green energy vision for PNG will lead to more jobs, a stronger economy, thriving communities, and importantly, lower emissions for Papua New Guinea. We share Prime Minister Marape's vision that PNG can be at the forefront of developing hydropower and geothermal resources for the emerging global green hydrogen industry.

Can Papua New Guinea get a hydropower project?

Two agreements with Papua New Guinea signed in 2020 and 2021 enabled feasibility studies on up to 18 hydropower and geothermal projects in the country, including a hydro project along the Purari River on the nation's southern coast.

Is TotalEnergies working on a Papua LNG project?

TotalEnergies (TTEF.PA), which is working on plans for its 5.4 million tonnes a year Papua LNG (liquefied natural gas) project, did not immediately respond to a request for comment.

On many indicators, Papua New Guinea's rapid population growth is outpacing development progress. Service delivery across the country is in decline. Growing urbanisation is increasing the burden on service providers as people who move from rural areas generally lose access to their customary land and become less self-sufficient. More than 40 per cent of the ...
