ITS Global The Economic Benefits of Land-Use in Papua New Guinea Foreword The role of forestry in reducing greenhouse gas emissions is an issue in UNFCCC discussions. It is expected to be discussed at the UNFCC conference in Copenhagen in December 2009. PNG and other developing economies with large forestry reserves have

Changes in what anthropologists understand "clan" to refer to, and the social relations that many sociologists think of as constituting a "nuclear family" are at the centre of this article. It is based on ethnography among Wampar speakers in north-eastern Papua New Guinea (PNG). Among the Wampar, different, sometimes

conflicting, transitions relevant to the ...

Mining is often portrayed as a contributor to sustainable development, especially so in developing countries such as Papua New Guinea (PNG). Since 1970, several large mines have been developed in PNG (e.g. Panguna, Ok Tedi, Porgera, Lihir, Ramu) but always with controversial environmental standards and social impacts often overlooked or ignored.

Studying Papua New Guinea, Bainton et al. (2020) found that the large-scale-small-scale interface, which runs through project cycles during operations, non-operations, and future mines, matter to ...
