

Philippines green energy solutions sa

Is the Philippines a laggard in the race for green energy?

It also aimed to increase renewable energy ("RE" or "renewables") usage to 35% to enable this goal. Plans are still in motion for the country's RE transition, but as far as progress is concerned, Southeast Asia's Green Economy 2022 Report found the Philippines to be a laggard in the race for green energy.

What is the Philippine Energy Plan 2020-2040?

The Philippine Energy Plan (PEP) 2020-2040 is the second comprehensive energy blueprint supporting the government's long-term vision known as Ambisyon Natin 2040. This updated plan, like its predecessor (PEP 2018-2040), reiterates the energy sector's goal to chart a transformative direction towards attaining a clean energy future.

What are DoE's Green Energy Initiatives?

These efforts and initiatives include renewable portfolio standards, renewable energy market, feed-in tariffs, green energy option program, net-metering program, expanded roof-mounted solar program, and green energy auction program. These initiatives are DoE's way to build and promote cleaner electricity in the country.

How will the government facilitate energy transition in the Philippines?

The government will intensify its effort to facilitate energy transition through policy reinforcement, investment facilitation, technological innovation, and infrastructure development. Click to view/download Philippine Energy Plan 2023-2050

How can the Philippines become an energy-secured and energy-sustainable country?

Transforming the Philippines into both an energy-secured and energy-sustainable country significantly requires the leveraging of opportunities and investments, especially in technology, innovation, and competent and skilled individuals.

How much energy does the Philippines use?

Currently, renewable energy generation stands at 22%, based on data from the DoE. In 2022, installed coal capacity increased by 14%, reaching 12,428 megawatts (MW). In 2023, fossil fuel remains the main source of energy in the Philippines; and coal reliance gradually increased, from 39% in 2012 to 64% in 2023.

The leading renewable energy company in the Philippines and Asia Pacific. As one of the leading sustainable energy companies in the Philippines and Asia Pacific, ACEN is dedicated to advancing renewable resources by promoting environmental sustainability and innovative energy solutions.
