

# Philippines solar power plant consultant

Who is Solar Philippines?

Solar Philippines is Southeast Asia's largest solar company with over 1,000 employees across numerous project sites. We have 400 MW in projects operating or under construction; and a multi-GW pipeline, including the world's largest off-grid solar projects and the lowest cost Solar Power Purchase Agreements in East Asia.

What was the first solar project in the Philippines?

AlphaSolar consulting executives and partners completed a 22.3 megawatt solar project at Clark Freeport Zone. The first solar project in a Philippine special economic zone. AlphaSolar built the first industrial-scale solar rooftop project for Viskase Asia Pacific Corporation. This was the first Viskase global branch with a solar power system.

Who is CGM solar & energy consulting?

CGM Solar and energy Consulting is comprised of a group of engineering experts who focus on creative solutions for complex engineering projects. Since 2019, we've accomplished much success with various projects. We strive for innovation and work carefully in order to stay within budget while providing maximum value for our clients.

How many solar PV plants are there?

Selected commercial & industrial rooftop and ground-mounted PV. More than 350 MWp solar PV plants developed in total. Get more insights in the international project portfolio of ENERGISTO including our bio & hydro power references here. Selected commercial & industrial rooftop and ground-mounted PV.

Why should you choose a custom engineered solar power solution?

For too long the country has been hindered by expensive and low quality power supply, but now, through the concept of distributed generation, individuals and industry alike can relieve this burden with a custom engineered solar power solution from Solenergy. Engineering Excellence is what makes us stand out in the industry.

How do you bring a solar power plant to life?

Bringing a solar power plant to life begins with a detailed site inspection as well as an energy data collection and finally leads to surveilled and optimal operation management. Our detailed services along the value chain are:
