

Photovoltaic Panel Installation Responsibility Letter

How do I install a solar PV system?

Components that are certified and tested for solar PV installations must be installed in accordance with the NEC and the manufacturer's installation instructions. Most residential solar PV systems are very simple from an electrical standpoint, and they can be designed by a solar or electrical contractor.

What should be included in a solar PV installation checklist?

The checklist does not need to take the exact form of this template, but it should include the basic information an installer, developer, or property owner would need to know in order to receive approval for the installation of a residential solar PV system.

Do you need an electrical engineer for a solar PV system?

Most residential solar PV systems are very simple from an electrical standpoint, and they can be designed by a solar or electrical contractor. In some circumstances, an electrical engineer may be required, and the enforcing agency determines if this is necessary based on the complexity of the system.

Can a rooftop solar PV system be installed on a building?

The vast majority of rooftop solar PV systems are installed on existing structures. Even though very few of these buildings were constructed specifically for installing solar equipment, many of them are well suited for PV systems.

Who should check the roof structure of a solar PV system?

5.9.4 The MCS Contractor shall ensure that the roof structure is checked by a suitably competent person to ensure it can withstand the loads imposed by the solar PV system. 5.9.5 For the typical roof structure types shown in Table 1, the calculation methodologies given should be used. A qualified structural engineer shall be consulted.

Do you need a roof access point for a solar PV system?

Solar installations must also allow for fire department smoke ventilation operations. The International Building, Residential, and Fire Codes outline the requirements for a roof access point and clear access points along the roof. The installation of solar PV systems may be subject to additional provisions adopted by the local enforcing agency.
