

What is agricultural greenhouse mounting system?

Agricultural Greenhouse Mounting System uses aluminum or steel frame, to cover solar photovoltaic modules for the greenhouse, while ensuring solar photovoltaic power generation and lighting of crops throughout the greenhouse.

What is a photovoltaic power station?

As one of the solar energy applications, photovoltaic power station, also known as solar ground park, solar farm or solar power plant, is a large-scale grid-connected photovoltaic power generation system (PV system) designed for commercial power supply.

What is a Solar Roof mounting system?

The solar roof mounting system is to install a solar power generation device on the rooftop and use solar photovoltaic technology to generate electricity in the building field. The solar PV carport is a system that combines photovoltaic power generation with carport.

What is a rooftop solar power system?

A rooftop solar power system, or rooftop PV system, is a photovoltaic (PV) system that has its electricity-generating solar panels mounted on the rooftop of a residential or commercial building or structure.

What is the production capacity of AKCOME solar mounting system?

The annual production capacity of AKCOME solar mounting system is 4G, which is in the forefront of China's PV mounting bracket industry.

Can solar panels be used in agricultural greenhouses?

The lighting needs of different crops can be met by erecting solar panels with different light transmittances in agricultural greenhouses, which can plant various high value-added crops such as organic agricultural products and precious seedlings, and can also achieve off-season planting and high-quality planting. .

Axe Struct (Pty) Ltd is a South African Manufacturer and wholesale supplier of absolute efficient PV Solar mounting systems for all applications. We provide structural analysis and installation ...
