

Photovoltaic inverter shipments in 2018

Where are solar PV inverter shipments coming from in 2021?

In terms of geographic reach, Asia Pacific consumed over half or 116,064 MWac of the global solar PV inverter shipments in 2021. Shipments to China, India and Australia accounted for the increase in demand, with Huawei and Sungrow maintaining its dominance in the region. Europe took up 23% of the global market with 50,770 MWac inverter shipment.

What is the growth rate for PV inverter shipments?

"The U.S. and Canada had 21% growth in PV inverter shipments, [there was] approximately 40% [growth] in both Latin America and the Middle [Eastern-African] and Turkey (MEA) [markets], and 50% [growth] in Europe," the report noted.

Why did global PV inverter shipments grow 22% in 2021?

Global PV inverter shipments grew 22% or 40,250 MWac (mega-watt, alternating current) to 225,386 MWac in 2021 compared to 2020. This is mainly driven by strong growth in markets in Europe, India, and Latin America where government support increased to meet decarbonisation goals.

How will photovoltaic inverter shipments change in 2021/2022?

It is expected that the company's photovoltaic inverter shipments will reach 47GW/66-70GW in 2021/2022, of which the distributed installed capacity will increase significantly. At the same time, quickly seize the newly added distributed installed capacity market. "Cellless" energy storage system strategy, the energy storage business doubled.

Are inverter shipments in Europe on the rise?

Inverter shipments in Europe suggest the continent is braced for another strong period of growth in 2018. GTM Research's global inverter report highlighted shipment growth of 34% in 2017 outstripping growth in European PV deployment of 8%.

What is the global inverter market like in 2017?

The global inverter market continues to concentrate. The top-20 vendors accounted for 93% of shipments in 2017, the highest since GTM began to keep track in 2010. Three-phase string inverter shipments grew 59% year-over-year and exceeded central inverter shipments by nearly 7 gigawatts.

2020 global pv inverter shipments TOP10. Six of the world's top 10 inverter shipments are from Chinese suppliers. They are Huawei, Sunshine Power, Growatt, Jinlang Technology, Shangneng Electric, and Goodway. In ...

Although global inverter shipment volumes rose 8% - year-on-year - in 2018, Huawei saw its market share fall 4%, due to the decision by China to rein in public solar subsidies. The importance ...

Photovoltaic inverter shipments in 2018

In a new report, GTM Research estimates global shipments of PV inverters reached 38.7 gigawatts (AC) in 2014 and will exceed 50 gigawatts in 2015. Shipments will continue to grow at an average ...

Global shipments of solar photovoltaic (PV) inverters are expected to surpass 50 GW this year and continue growing at an average annual rate of 13.1% through 2018, GTM Research said in a new report. For ...

While the world grid-connected three-phase PV inverter shipments were slightly down at 93,427 MW, shipments of the single-phase segment increased by 11.2% to 11,098 ...

The global PV inverter shipment is expected to be 66.0GW in 2016 and over 90GW in 2020. China is a major PV inverter market in the world. In 2015, its PV inverter shipment reached ...

PV Inverter Market, 2017 to 2022 Historical Sales, Compared to 2023 to 2033 Future Outlook. According to Future Market Insights, the global PV inverter market is predicted at a healthy ...

Global PV inverter shipments grew 22% or 40,250 MWac (mega-watt, alternating current) to 225,386 MWac in 2021 compared to 2020. This is mainly driven by strong growth in markets in Europe, India, and Latin America ...
