

# Photovoltaic panel braided copper strip jumper wire

What is a solar bonding jumper?

Solar Grounding Copper Bonding Jumper,... Solar grounding bonding jumper (SPC-BJ-01) is used to establish electrical connections between two stainless steel conductive sheets. The bonding jumper is composed of tinned braided copper wire, and WEEB is connected to both ends of the jumper.

What is a bonding jumper?

The bonding jumper is composed of tinned braided copper wire, and WEEB is connected to both ends of the jumper. WEEB provides reliable air-tight electrical connections, while braided copper wires allow thermal expansion.

What is a grounding bonding jumper?

This maintains electrical continuity over long spans or air gaps between metal structures. Grounding bonding Jumpers are available with conductive and back-up plate, which provide a reliable, gas tight electrical connection, and the braided copper wire allows for thermal expansion.

Wintex Metal Industries - Manufacturer of Copper Wire, Copper Strip & Braided Copper Wire Rope from Vasai Virar, Maharashtra, India. Wintex Metal Industries. Vasai East, Vasai Virar, ...

Our Braided Copper Wire Electrically Connect For Solar Panel is designed to bond solar modules to the aluminum rails and the aluminum rails to ground, to make sure the whole solar system is ...
