How do I install a flat roof solar array?

Complete row-to-row bonding in the array. Connect arrays to equipment ground. Complete wire management with weatherproof ties. Manage wires underneath module and Chassis flange. Create mounting platform for inverters. Add anchors to the ballasted system. IronRidge BX delivers superior power density and design flexibility to flat roof solar arrays.

Can a solar panel tilt mount be installed on a flat roof?

Build strong and efficient solar arrays on flat roofs. IronRidge Tilt Mountsupports a wide range of solar panel tilting angles, while also resisting the extreme wind and snow forces experienced over a building's lifetime.

Can you add solar to a flat roof?

Fully certified. Adding solar to a flat roof has built-in complexity and requires a wide array of options to meet the building requirements--such as a mechanically attached system, a ballasted system, or even a hybrid system. An attached system that utilizes the strength of XR Rails to support a wide range of solar panel tilting angles. Learn More

Are ironridge racking systems compatible with solar panels?

Their equipment has been tested and certified in a number of states and are compatible with the majority of solar panels on the market. If there is not an immediate solution available for your solar racking system, you can work with IronRidge to create a custom system that is sure to fit your needs at an affordable price point.

Does ironridge tilt mount work on flat roofs?

every angle. Build strong and efficient solar arrays on flat roofs. IronRidge® Tilt Mount supports a wide range of solar panel tilting angles, while also resisting the extreme wind and snow forces experienced over a building's lifetime. The Tilt Mount System is listed to UL 2703, and compatible with most roof anchor products.

How do I choose the right Solar Roof mounting system?

The selection of the right solar roof mounting system hinges on several critical factors: Roof Type and Material:Different roofs require different mounting solutions. Whether it's a flat commercial rooftop or a pitched residential roof, the material-be it metal, tile, or asphalt-will dictate the appropriate mounting system.
