

Photovoltaic panel lifting suction cup specifications

What is the transport frame of a vacuum lifter?

The transport frame consists of different parts of the modular lifter. These ensure damage-free transport and easy assembly of the vacuum lifter. In addition, a cover is available to protect the lifter from dirt and rain. The CladBoy from VIAVAC for installing sandwich panels for the roof, structural roof deck trays and cladding panels.

What is a Solmetric module lift?

Description The Solmetric Module Lift is designed to safely and quickly transport a PV module to a roof. The device uses your existing fiberglass Werner or Louisville extension ladder. A pulley system is attached to the top of the ladder.

How does a PV module work?

The device uses your existing fiberglass Werner or Louisville extension ladder. A pulley system is attached to the top of the ladder. A patented module "hook" attaches to the edge of a PV module frame and prevents lateral sliding of the module in the hook. An operator pulls the rope to raise the module.
