Are solar panels worth it?

The pros of solar panels are immense, and if you can afford the upfront cost they are absolutely worth getting. With solar panels, the average three-bedroom home will save £454 a year on their energy bills. And if you're exporting excess electricity to the grid via the SEG, you'll make an additional £160 per year.

How much do solar panels cost?

The price of a typical 3.5 kilowatt-peak PV solar panel system is about £7,000. Based on the Energy Saving Trust's figures, it could take someone living in the middle of the country, in a typical home, anywhere between 12 and 17 years to recoup the costs of installing panels, based on current Energy Price Cap rates.

Are solar panels worth it in the UK?

Solar panels are definitely worth it in the UK. The average three-bedroom household will save 70% on its electricity bills by going solar, and break even on the cost of its panels after just 15.66 years. It's a large upfront cost - but if you can afford it, solar panels make an excellent investment.

Are solar panels a good investment?

Over the past decade, the cost of solar power has halved, making it a more attractive option for homeowners. With gas prices on a rollercoaster and climate change concerns mounting, solar panels are expected to become even more cost-effective in the future. After installation, solar panels start saving you money on energy bills immediately.

Are solar panels worth the money if you move home?

Generally, it's considered that solar panels take around 11 years to recoup the upfront cost. While this may reduce in the face of rising energy bills, you should still consider carefully whether they are worth the money if you plan on moving home within this time frame. It always helps to have a financial expert on your side.

Do solar panels save money?

The more electricity you use, or the higher its price rises, the more money you will save by installing solar panels. The amount of electricity your home uses depends on how many people live there and their habits. The table below shows potential annual savings for different parts of the UK, depending on how much you're at home during the day.
