

Photovoltaic panels cheat money

Are you getting ripped off when buying solar panels?

Solar is expensive, no matter how you shake it. And savings sound nice, but if you get stuck with an overpriced solar panel system that's underperforming, you're going to save much less. That's why we put together these tips to avoid getting ripped off when buying solar panels -- backed by expert advice.

Does rooftop solar have a fraud problem?

Rooftop solar has a fraud problem. The industry is working to build back trust. All this threatens the residential rooftop solar industry's impressive momentum, and some are working to repair its reputation. But what if you want to go solar now?

Are solar customers victims of fraud & forgery?

Across the country, prosecutors are investigating high-pressure sales tactics and misleading financing arrangements. Some customers say they were victims of fraud and forgery. The Consumer Financial Protection Bureau recently warned solar customers about hidden fees and deceptive statements about the financial benefits of solar.

Do solar energy installations pay for themselves?

Solar energy sales pitches often say the programs and equipment pay for themselves through lower energy bills or tax benefits. While solar energy installations can lower your energy bills, the exact savings are hard to predict. Sometimes, you have to pay for upkeep and repairs in addition to high loan payments.

Do solar panels save you money?

Solar panels installed and operating correctly will reduce the electricity you use and can save you a bunch of money, but the effect on your bill will vary. Before going solar, be sure you understand how your utility compensates you for the electricity you produce. These rates aren't necessarily set in stone.

Are solar panels a good option for homeowners?

Fortunately for the solar-curious, many options exist for homeowners and even renters to get some or most of their electricity needs met with energy from the sun. The most common way to go solar for homeowners is the installation of panels on their roofs.

All solar panel strings connected in parallel have to feature the same voltage, and they also have to comply with the NEC 690.7, NEC 690.8(A)(1), and NEC 690.8(A)(2). Modules need to be the same model in all ...
