Top paying companies in Energy, Mining & Utilities for Solar Technician are Titan Renewables, Enel, and Sunrun. What is the pay outlook for Skilled Labor & Manufacturing?

How many solar photovoltaic installers are there?

Businesses now employ some 11,800 solar photovoltaic installers. That number is projected to increase to 17,900 by 2030. The increase in solar energy use will create a greater demand for installers who must maintain and fix systems at residences and businesses.

Do solar energy technicians need to be electricians?

No. Solar energy technicians do not need to be electricians, but they do need a basic understanding of electrical systems since they must install and maintain solar systems. The job requires connecting the solar panels to the electrical grid, which is often done under the guidance of a senior solar energy technician.

How do I become a solar installer?

Most solar panel installations are done outdoors, but PV installers sometimes work in attics and crawl spaces to connect panels to the electrical grid. Installers also must travel to jobsites. Although installers typically need a high school diploma, some take courses at a technical school or community college.
