Global concerns about power systems, including the storing of surplus renewable electricity, result in increasing interest in hydrogen [1]. Nowadays, energy systems face numerous challenges that mainly stem from climate change and decarbonisation policies, whereas hydrogen seems to partly address these issues [2]. The transition from fossil fuels to low- or zero-carbon ...

The transformation of the energy sector towards an increased share of renewable energy sources in the energy mix requires attention in the area of electricity storage. Renewable energy sources (photovoltaics or wind energy) are marked by the intermittency of electricity production and require the construction of energy storage to adapt the energy ...
