Pitcairn Islands bess diagram

Does Pitcairn Island have an eroding coastline?

Although there is little evidence of an eroding coastline at Pitcairn, there is an increase in the risk of soil run-off from the island after heavy rainstorms. This risk comes from two main sources: earthen roads and open areas of bare soil lacking vegetation, which are caused by landslips after heavy rainfall.

Where are the Pitcairn Islands located?

The Pitcairn Islands are located in the central South Pacific, almost exactly midway between New Zealand and Peru. They are positioned between longitudes 131° and 124° Wand latitudes 23° and 26°S. Access is by sea only.

Who inhabited Pitcairn Island?

The presence of stone tools, burial sites, petroglyphs, and other artifacts indicates that Pitcairn Island had been inhabited, probably by Polynesians, before its discovery by European explorers. The British ship HMS Swallow found the island in 1767, and its captain, Philip Carteret, named it Pitcairn for the sailor who first sighted it.

What is the extent of the CCA around Pitcairn?

The CCA around Pitcairn extends 40 nm to the southeastin a tapering triangle shape and then encloses Adam's Seamount (known locally as 40 Mile Reef) with a 2 nm radius. The reason for designating the tapering triangular shape is to allow Pitcairners the opportunity to undertake trolling during the journey to/from 40 Mile Reef.

How long does it take to reach Pitcairn Island?

It takes 36 hoursto reach Pitcairn Island by ship from Mangareva (the nearest island in the Gambier Islands of French Polynesia). In the opposite direction, the next landfall is Rapa Nui (Easter Island), approximately 2100 km distant (Irving &Dawson, 2012).

How big is Pitcairn Island?

Land area Pitcairn, Henderson, Ducie, and Oeno islands, 13.7 square miles (35.5 square km). Pop. (2008) 66. This article was most recently revised and updated by Lorraine Murray. Corrections?

Nestled in the heart of the vast Pacific Ocean, the Pitcairn Islands stand as a testament to pristine beauty and untouched landscapes. Comprising four main islands--Pitcairn, Henderson, Ducie, and Oeno--this remote British Overseas Territory is renowned for its rugged cliffs, turquoise ...

Map of Pitcairn Islands. The history of the Pitcairn Islands begins with the colonization of the islands by Polynesians in the 11th century. Polynesian people established a culture that flourished for four centuries and then vanished. They lived on Pitcairn and Henderson Islands, and on Mangareva Island 540 kilometres (340 mi) to the northwest, for about 400 years.

Discovery of Pitcairn Island . Captain Philip Carteret first spotted Pitcairn Island in 1767 but couldn"t land due to rough seas. He miscalculated its location, marking it miles away from its true position. Years later, Captain Cook showed some interest, but it wasn"t until the Bounty mutineers arrived in 1790 that the island gained attention.

Pitcairnsaaret [1] (englanniksi Pitcairn Islands, pitcairniksi Pitkern Ailen) on neljästä saaresta (asuttu Pitcairn, asumattomat Oeno Island, Hendersoninsaari ja Ducie Island) koostuva saariryhmä eteläisellä Tyynellä valtamerellä, suurin piirtein Uuden-Seelannin ja Perun välisen matkan puolivälissä. Se on Britannian viimeinen siirtomaa Tyynellämerellä.

The diagram for Pitcairn Islands shows the days per month, during which the wind reaches a certain speed. An interesting example is the Tibetan Plateau, where the monsoon creates steady strong winds from December to April, and calm winds from June to October. Wind speed units can be changed in the settings (top right).
