Pliant energy systems Chile

Who is pliant energy systems?

Pliant Energy Systems conceptualizes, patents and develops highly novel technologies in the fields of marine robotics, propulsion, electricity generation, and pumping. "As our island of knowledge grows, so does the shore of our ignorance." PLIANT ENERGY SYSTEMS - INFO@PLIANTENERGY.COM - (718) 522-3962

How do pliant robots work?

Pliant's robots use several modes of locomotion found in the animal kingdom with just one pair of "fins". These fins are best described as four-dimensional objects with a hyperbolic geometry that allows the robot to swim like a ray,crawl like a millipede,jet like a squid,and slide like a snake.

How does pliant Velox work?

Pliant's Velox prototype uses undulating finsto move large volumes of water at low velocity. A battle is brewing over the fate of the deep ocean. Huge swaths of seafloor are rich in metals --nickel,copper,cobalt,zinc--that are key to making electric vehicle batteries,solar panels,and smartphones.

C-Ray platform is a unique autonomous amphibious vehicle, developed by Pliant Energy Systems in Brooklyn NY, with funding from the Office of Naval Research (Dr. Tom McKenna at ONR). It can use several modes of locomotion found in the animal kingdom using just one pair of fins.

Pliant Energy Systems patents and develops technologies in the fields of electricity generation, marine robotics, propulsion and pumping. Products under development include the amphibious robot Velox, passive irrigation pumps and generators that harness the kinetic energy of flowing water to generate electricity.

Pliant Energy Systems has developed a new engineering paradigm for harnessing the energy of flowing fluid,

Pliant energy systems Chile

and for making fluid flow with as little energy as possible. All the technologies emerging from this paradigm concern ...

Still, the engineers at Pliant Energy Systems are currently developing a next-gen version called C-Ray, which will likely be utilized to survey the ocean floor for potential hazards, and is funded by the US Navy, who is currently backing the ...

(Credit: Pliant Energy Systems) Autonomous robots may make the process less risky and energy-intensive. Benjamin "Pietro" Filardo is another advocate of polymetallic nodule exploration, who believes the resource can be harvested with even less impact on the environment than The Metals Company plans to make. His company, Pliant Energy ...

Pietro Filardo is the Founder & Chief Executive Officer at Pliant Energy Systems based in Brooklyn, New York. Previously, Pietro was the Senior De signer at PJAR Architects and also held positions at The Rockwell Group. Pietro received a Bachelor of Science degree from University of St. Andrews and a Bachelor of Arts from The University of ...

Pliant Energy Systems specializes in the development of technologies within the marine robotics, energy generation, and pumping sectors. The company's main offerings include amphibious robots, systems for harnessing kinetic energy from flowing water to generate electricity, and passive irrigation pumps.
