

Power smart solutions Djibouti

How can Djibouti achieve its energy goals?

Djibouti's substantial potential for geothermal electricity generation, along with its rising capacity to produce energy from wind and solar power plants, should help the country reach its goals in coming years. In addition to the growing need for generation capacity, the expansion of renewable energy is key for Djibouti to diversify its economy.

Does Djibouti have solar energy?

Djibouti has significant solar energy potential, with an estimated average daily global horizontal irradiance of 4.5 to 7.3 KWh per sq metre across its territory. The construction of the first large-scale solar generation project began in November 2022 in the Gran Bara Desert, which is located in the country's southern region.

How does Djibouti produce electricity?

This is mostly supplied by thermal power plants that utilise oil and diesel as fuel. The two primary plants in Djibouti City have a combined generation capacity of roughly 122 MW, with two smaller plants located in Obock and Tadjoura.

What is the Djibouti office for geothermal energy development?

The Djibouti Office for Geothermal Energy Development (Office Djiboutien de Développement de l'Energie Géothermique, ODDEG), directly overseen by the presidency, is charged with developing the country's geothermal energy potential. ODDEG was set up in 2013 to expand and operationalise the sector.

What is a power purchase agreement (PPA) in Djibouti?

Amea Power has secured a power purchase agreement (PPA) for a 25 MW solar-plus-storage project in Djibouti. It will be the country's first independent power producer (IPP) project and is now in development under a build-own-operate and transfer (BOOT) framework.

Who regulates geothermal energy in Djibouti?

The Ministry of Energy and Natural Resources formulates policies for the sector and regulates the electricity market. The Djibouti Office for Geothermal Energy Development (Office Djiboutien de Développement de l'Energie Géothermique, ODDEG), directly overseen by the presidency, is charged with developing the country's geothermal energy potential.

It is essential when looking for a solar provider that you look for accredited solar products and installers, to avoid poor quality and dangerous panels. PowerSmart Solutions are accredited by the Clean Energy Council in Installation and Design. We guarantee the installation of high-quality, safe solar panels for your home.
